PROFESSIONAL SUMMARY

Operations and Customer Success professional with 11+ years at Magzter, currently leading a 10-member team and supporting 500+ global publishers. Experienced in project coordination, stakeholder management, process improvement, automation, and cross-functional delivery, recently lead 3 initiatives. Seeking to transition into Project Management, bringing strong operational, customer-facing, and execution experience.

CORE COMPETENCIES & SKILLS

Project Coordination, Project Planning, Stakeholder Management, Cross-functional Collaboration, Requirements Gathering, Project Tracking, Risk & Issue Management, Dependency Tracking, Customer Engagement, Process Improvement, Operations Management, Team Leadership, Executive Reporting, KPI Management, Workflow Automation, Root Cause Analysis, Power BI, Microsoft Excel, JIRA, Microsoft Power Automate, Looker Studio, JSON, FTP/SFTP

PROFESSIONAL EXPERIENCE

Operations Team Leader - Magzter

August 2021 - Present

- Lead a team of 10, managing task allocation, KPI performance, coaching, onboarding, performance reviews, and day-to-day operational delivery while maintaining accountability across the team.
- Manage operational relationships for 500+ global publishers across the US, UK, Canada, Australia, and India, including enterprise accounts, while maintaining 95% CSAT and monitoring SLA, resolution time, escalations, and retention.
- Coordinated 3 cross-functional projects, working with Engineering and Operations teams to gather requirements, clarify dependencies, coordinate testing, track progress, follow up on action items, and drive implementation.
- Coordinate complex customer and operational escalations by identifying root causes, working with Engineering and QA on solutions, communicating progress to stakeholders, and ensuring issues move toward timely resolution.
- Develop 5+ reports per month, including executive reports for leadership and reports for B2B clients, and build Looker Studio dashboards to improve visibility into operational performance and support data-driven decisions.
- Implemented process improvements and automation using Microsoft Power Automate and Google Apps Script, saving approximately 30 minutes of manual effort per day and contributing to the Operations Efficiency Award (2024).
- Improved internal publisher file-download efficiency by approximately 35% by helping implement an office network-whitelisting solution that removed the need for Akamai for the internal workflow, while also contributing to SOPs, process documentation, onboarding, and continuous improvement initiatives.

KEY PROJECTS

- **File Transfer Workflow Automation:** Coordinated the automation of file transfer workflows across 87 accounts and 900+ titles, reducing approximately 70 hours of manual effort per week and improving operational efficiency by 92%.
- **Client-Side Data Transmission Module Upgrade:** Coordinated the replacement of a legacy PHP-based transmission module with a Node.js solution, achieving 50% faster file uploads, zero reported errors, and 98% SLA performance.
- **File Management & Delivery Schedule Dashboard:** Initiated the development of a delivery scheduling and automation dashboard covering 58 accounts and 5,771 records, saving approximately 4 hours/day and improving efficiency by 95%.
- **PDF Pre-processing & Enhancement Dashboard:** Organized the implementation of a configurable PDF preprocessing workflow across 1,562 titles, reducing approximately 2 hours/day and Adobe Acrobat dependency by 35%.
